**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 33-36, drawn to a process for preparing an extruded product, classified in class 264, subclass 141.
- II. Claim 11-21, 28-32, drawn to a process for preparing a solution, classified in class 264, subclass 211.13.
- III. Claims 22-27, drawn to a process for preparing a film, classified in class 264, subclass 232.
- IV. Claims 8-10, drawn to an extruded starch product, classified in class 428, subclass 411.1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions each invention performs a completely different function.

Inventions I and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the

process as claimed can be used to make other and materially different product, such as one whose starch is not required to be substantially completely soluble in water at 25°C.

A telephone call was made to Jeremy Lowe on 10 September 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
